

Magna Carta 2023, Pacifying West

To lift the spell of Rome's takeover of Paris in 1516, and their lukewarm school and influence peddling on the world.

EDITO 2023

Magna Carta 2023 is the first document that warns of the traffics of authoritarianism infiltrated in legal and pedagogical circles, and considers the *law of inertia* of 1687 as a power in itself to grow a worthy school over the "black hole of science and technology" and the millennial schismatic black hole of apostasy (MSBH)

Public:

Graduate *engineers and technicians* in the world.

Call To Action (CTA)

Ladies and Gents,
You are custodians of the intellectual and moral heritage of West.

It is thus to you that falls, in spite of the traffics, the arid but enthralling *responsibility to transmit* it.

PURPOSE of Non-Fiction:

"Narrative of real events and *facts*"¹ *to grow*, namely "engineering inputs, the most difficult to value"² - with the help of competitive analysis³.

I. YOUR VICTORY over adversity

You have emerged victorious from a training course full of pitfalls, whether you are aware of it or not: for my part, it is from 1971 onwards, in high school, with Pr. Mérindol, that I became aware of the *traffics of lukewarm school* denounced in 2022 in order to consolidate the school of Palo-Alto.

Notes and references

¹ Cambridge Dictionary

² Le système d'information de l'entreprise, Editions comptables Malesherbes, 1988

³ A discipline Newton asserts, "carried on the shoulders of giants" like Descartes, whose emblematic scientific contribution he extends—the Cartesian benchmark— after exposing its scientific limit, which he then oversteps by distinguishing between relative and absolute benchmarks to define the "law of inertia", and specify the "laws of equilibrium and motion."

II. AUTHORITY MAP over two black holes

Complementary histories of *science* of construction science *and* monotheist *spirituality*.

- What I want to do

Stop wars by *replacing the traffics* of lukewarm⁴ school *with the mission*⁵ of a worthy school

- Why I think you should care...

Because *lukewarm school misleads you*⁶ if you deny its traffic, and you are in danger!

- Why I think you will want to help me

To grow the distinction between the authoritarianism of lukewarm schools⁷ and accepted authority⁸ *as to engineering*⁹ – not just about technologies weapons and wars, but about authority.

III. WARS COME FROM TRAFFICKING, not the other way around

I ascribe the cause of wars to the *irresponsible teaching of PMA* (Principle of Mutual Actions), dissociated from realities, in France¹⁰, *by generalists who aggravates the propensity of ignorance* to fight against what is opposed to its will – beings, nations¹¹, cultures.

- Unfathomable whirlwind

The purpose, however, is not so much¹² to condemn these felonious officials as to preserve the Western heritage, in order to escape confusion and danger, by emphasizing the superiority of the law of inertia over the pseudo-fundamental principles taught in France, among other¹³ insidious traffics.

- The alibi of those perverse generalists

The "power of mathematics" over centuries, to formulate the laws of equilibrium and motion and apply them to the science of construction (read more, *la moindre action*, Anne Sinquin 2014)

- The 1966+1977 crime – among other Trojan Horses

Hijacking of the heritage of scientific ratings considered "not as a starting point for the student", but as a lever for "social conquest" for these generalist civil servant-teachers.

- About these fake teachings and legitimate authority

Thus, in France, « writing, oral, and image »¹⁴ conceal « *object, image, and theory* »¹⁵. Learn more: « From rout to accomplishment », Pierre-Richard Crocy, Google Play 2022 (to be translated).

⁴ Reference to the traffic of some generalists who grand neither the science de la construction nor the divine inspiration of our dreams.

⁵ AVERTICATING from the fall; EDIFYING over two black holes, by promoting both the constitutional character of the law of inertia of 1687 and the authority of a unique message of salvation to the various stages of the rational mind; PACIFYING by replacing the traffics - Trojans, drugs and pharmacochimistry - of a massive banditry, by the providential observation of an equally massive monotheism, at the exit of the TNSA, at the dawn of Aquarius.

⁶ Yi-king situation n° 25 and its western equivalent, the fall "from Charybdis into Scylla"

⁷ Collusion between the rigorism of an inhibiting approach to science and the evasiveness of biased letters

⁸ Masonic thought and its three major orders - Doric, Ionian and Corinthian - metaphors for mechanics, sociology, and poetry
